

Have refugees earn their stay in Australia. Australian welfare, training and housing grants should be for working asset poor citizens with 2 ancestors born in Australia. Refugees should be allowed to work in the community where self reliant and passing character and health checks. We should remand welfare reliant refugees in custody and have them earn their keep by fruit picking or as aid workers, doing military service refugees who have had on average 8 children and keep them safe until safe to repatriate as an aid worker or NATO military protector of other crippled refugees going back to an opposite region to the region of origin in their country of origin and paid to bring income of 1million refugees up to \$5 per day for \$1.5 billion rather than giving \$100billion per years intake for life long welfare superior than to Australian working poor provided to 10,000 and dependents put on royal treatment welfare for life. The average of the 80% welfare dependent for life resettled refugee has drawn 100x more welfare than the average working asset poor Australian citizen.
