

I always believed Australia for its fairness and friendly dealings with every one. If this bill you introduce gone make all of us Australian graduated students feel wrong and treated as unfair.

I am living here since more than five years; I finished my studies here and after that working in my field as cook since then. I always go with patience when ever your department changes there rules, I went through graduation visa programme finished more than necessary experienced and then applied for PR as matter affect seems you still playing with our life because since then I spend lot of money in your country to settle down spend all the expenses for applying these visas all hidden costs which you may not be aware that we spend as well not only your visa fees.

These five years took me very hard to stand on path in this country, if you do this unfair treatment with us I m going think like that I loosed many years of my life which make to do start every thing again somewhere else.

I know it doesn't matter with you about our feelings but think that we lived in this country paid your taxes work legally and helped your economical power to rise.

I believed we that we students did big hand towards economy to recover quickly from recession and now you want to rid of us because of your impact on elections only.

Please who ever read this consider this for treating us fair not to such a these cheap moves which is going to make Australian regret in the whole world after this move.

I am sorry if I said something which you not like but that's a truth.

Regards,

GSM visa applicant since 2008

Thanks.
