To whom it may concern

I object strongly to the wind farm proposal by RES, that has been proposed to be situated so close to the small community of Peshurst.

I am a new resident of Peshurst. Had I known of this proposal, there is no way I would have purchased property here.

Peshurst is a beautiful little township just waiting to be discovered and this is happening with new shops opening and new houses being built.

People from the cities are discovering Peshurst, as I did.

With its beauty of this Volcanic landscape, which is part of the registered Respected National Geo Park Kanawinka that stretches from

2) Colac to Mt Gambier, where the Stoney rises and isolated volcanoes can be seen.

I am not against wind farming.

What I am against and strongly object to, is the closeness that RES are erecting these huge enormous towers to small communities.

If you must have these enormous wind towers, —

they should not be in the vicinity of a 10 kilometre radius of any township

We have our rights, it is not just yours to do as you wish with our communities

the whole concern has been dishonestly dealt with

As for Penhurst, what is going to happen to our natural Spring that we have

Can you honestly tell us how this will

③ be affected with the blasting that will be taking place to erect these towers

Is Res going to interfere with our Geo area ???

Yes they will.

I definitely object to the Penshurst wind farm, or should I say wind factory as their proposal is 225 turbines ranging from 135-175 metres tall the highest geological feature here at Penshurst is Mount Rouse standing 100 metres

Do you think this is fair

No it is not

I am damn sure you would not like these enormous towers at your own back door

I am damn sure I don't and will we be compensated when our land values fall.
