

## **REQUEST FOR MY FUTURE**

My name is Sarbjit Singh and I came in Australia in JAN 2007. I started my study in Hospitality Management course in 2007. I totally disagree from this government decision. We paid for transportation without any student discount which is very expensive. This is so unfair with all students who spend their 3 to 5 years of their life in this country and spend near about \$25,000 to \$40,000 only on their studies and today it seems totally wasted .I spent more then 3 year of my life in this country and I thought I'll get a good future and smooth life in this Country and my parents also think that I will get a good future in this Country .Last year 2009 I applied for my PR. According to your requirement I am doing a job in Restaurant from JAN 2007 and I am still working their and I worked according to your work visa conditions and also I didn't work in any other field and we paid tax as well. My Aim is to be a good chef and open my own Business in Australia but now Government just take couple of hours to change or apply this rules but you should think once on the behalf of students that what will be happen with their future. We have done very hard work over here. we been living here from the last 4 yrs it seems like our own country. Teenage life is for enjoyment but I sacrifice all that because of my better future not for worse. Why doesn't a government think about the **QUOTA** before granted visas or accepted our files? From the last 3 yrs they changing the rules but they always says these rules will not be affected on those students who have already submit their files according to previous rules...these new rules are only for those people who haven't applied their files. I m sure that you will definitely think about our future before making any decision. It's a humble request to you Please .....THANKS.

**Yours faithfully,  
Sarbjit Singh**
