

I wish to voice my view on this particular bill before the senate.

You people must get your prospective right, this bill is not for the long term protection of all animals it is a quick fix waste of time!

If the senator in question was facing a dilemma of a human nature I would think the forcefulness

And the intensity and of course the repercussions would be a lot more severe.

Please do a bill but make it substantial for all animals and a criminal offence, time is not on the side of these animals.

Re think and be clever for once!

Regards

Deborah Eggers
