

Dear madam/sir who concern:

I am writing to you to deprecate the Migration Amendment (Visa Capping) Bill 2010, because if this bill has passed that means the credibility to Australia government is nothing, and would deprive the valued human right away from 140,000 people and more in the future.

I am a TAFE student who lodge the application of become a permanent resident more than 2 years ago, but the application has been hang up since January 2009. I felt the hard work of immigration department staff did and totally understand their decision that they stopped to process my application for a period of time (it was 2 years waiting at that time), the 2 years has passed and now I heard this visa capping bill was tabled. This bill astounds me in many ways. Firstly, the bill is going to deny my endeavor all there years. Secondly, this bill let the country of hope lost its credibility to us who really wanted to help to build our dream. Come last, this action that brings this kind of bill on the table will destroy my faith in between people. Even a whole nation can break her promise that easily, how about a human-being, it is not trustworthy of anyone. The society will become chaos in not distant future. This is the result we don't want to see.

My father asked me about that why I decide to stay in Australia instead of go back home. I answered, I want to stay because this is a great country with lots of hope and opportunities, I want to live in this kind of country-- the country has less deceptions and pressure. They believe of God not in person. When I recollect all these memories now, suddenly I think I was wrong there are deceptions in this country, not the people but the government itself. That is very disappointing.

After all, I think the immigration department wants to clean the mess they have made themselves by sacrifice 140,000 people's future. Also gains power of the chief of the department himself which would make him a new reason to be bribed. In the other way, I worried about the stability of the society after such a huge change-over. And who dare to ensure that 140,000 desperate people would not do anything harmful to the country? I won't let to risk our live, especially in the election year. And some people says new immigrant make them lost their job, funny thing is sloth make people lost their job, not by the other person.

Best regards

Yiduo Yang
