Committee Secretary, Senate Standing Committees on Environment and Communications, PO Box 6100, Parliament House, Canberra ACT 2600.

Dear Sir/Madam,

Re <u>Environment Protection and Biodiversity Conservation</u> Amendment (Retaining Federal Approval Powers) Bill 2012.

I wish to record my support for this bill whereby the Federal Government will retain responsibility for important environmental decisions within Australia.

The Federal Government would be expected to have a broader perspective than a State Government. It is better positioned to know, understand and honour international, environmental treaties eg. The RamsaarConvention, JAMBA, CAMBA and ROKAMBA.

It could be difficult for a State Minister to decide on an issue involving more than one state eg. Murray/ Darling Basin, and could lead to favouring his/ her own state.

Thank You.

Yours faithfully, Marion Shaw
