

Subject: Senate Inquiry into the Landholders' Rights to Refuse (Gas and Coal) Bill 2015
Date: Monday, 11 May 2015 2:06:15 PM

Dear SA Senators

I wish to put it on record that I am in support of the bill being brought to you for consideration that would require a landowner's express (written) permission before any corporate 'fracking' (or works related to fracking) could take place, or be approved to take place, on their land.

I am not convinced of the safety of 'fracking' and, in order to counteract the huge leverage of mining corporations, who have no real interest in any future, post-mining use of the land, landowners really need this basic protection.

I trust you will put the food security of our great state before short term financial gain and support the required aspects of this bill.

Best regards
Wendy Burrill
