

Respected Sir,

In this submission I want to state that I have been in this beautiful and peaceful country for around 5 years now.

I completed my studies in Community Welfare, proficient in IELTS test and have already applied for Permanent Residency

on 15-May-2010 like many others.

When I came here in the beginning, my parents organized for a big student loan for me so that I could study in a country

like Australia of what I heard to be always considered as an unbiased nation that always welcomes and respects

people from all over the globe which undoubtedly all came to be true and much more to my expectations.

I studied very well here with lots of High Distinctions in my course of Community Welfare.

While I was studying here,

and as I was able to work no more than 20 hours a week, my parents had to send me lot more money for my expenses by

cutting down there budgets and expenses, and unfortunately even mortgaged our house which I was told about only last year.

I must say with a very heavy heart that they gave away all their life long savings so that their son can

have a better future than them. In last 5 years I have been to my country only ONCE.

When I came here I was just a boy(in age, attitude and experience), but now I have matured to a man in all respects.

I have given and offered my most prospective years in the land of 6 states and 2 Territories.

It has been very difficult

to find a job as a welfare worker as I do not hold a permanent visa yet, but I am quite confident that I will get

a job as welfare worker because of skills, hard work, communication level, selfless and helpful attitude I possess.

After hearing about the Visa Cap and Cease Bill, I am in a very disoriented and emotional state as what would happen

if my visa gets cancelled because of Cap and Cease Bill. This Bill has definitely taken its toll on me and my family

mentally even when it is not passed, and would definitely ruin me and my family financially permanently, and to add

further, my mother is a heart patient. They were waiting for last 5 years so their son can be a helping hand to them

and then came this announcement, and if applied, is surely going to destroy many lives forever, as I can see my

career end and lifelong debts already, not to mention parents health and wealth sacrifice in vain.

Finally, I would say that me and many other people applied here in greatest faith and had I known in the beginning

about the ceasing applications I would have definitely made some options open to myself but it is too late now for me

and I am quite sure, for many others as well.

I really request with a very heavy heart and broken financial position to give a fair go to the applied applications already as these are not just applications but real lives.

Please think on humanitarian grounds too before making some decisions.

I would be overwhelmed and delighted if you decide to give applications a fair go with tears in my eyes again,

but this time they would be tears of happiness.

At this time I have to say that our future is in your hands. One stroke of a pen would destroy many lives

to an unimaginable extent.

I really wish this submission gets noticed as it is not just my story, and many real lives are at stake hanging between

good life and/or mentally financially disturbed life forever.

Yours sincerely,

ABC

P.S. Please believe that everything that I have mentioned is true.
