

i totally disagree with this rule .already govt here made mess for us.i came here 2 years ago in hospitality coarse. i spend alot here.work hard in night shifts nd in early morning go straight to college after job without any rest to save money so that i can pay fees for college ,rents also staying far from my family and finished my study last week nd i got this news.this is unfair to us .govt needs to understand for the people who applied for residency and who finished thr studies.i did masters in computer application in my country and came here with dream that after getting residency i will work with big IT companies nd will make small effort for the promotional development of this country.

i suffered day nd night for better future nd life here.

i wanna ask from this australian govt who and which country gonna trust u .we fullfil the requirements of this country for residency nw instead of giving us something they r gonna take this unfair step.

this means they want money from overseas student not for the betterment of this country but for themseves.

now i want answers of my question nd feedback from this immigration department that who will take the responsibilty of these overseas students
