

My name is sahil kochhar and I came in Australia in JAN 2007 . Then I started Hospitality Management course. I totally disagree from this government decision. This is so unfair with all students who spend their 3 to 5 years of their life in this country and spend near about \$28000 only on their studies and today it seems totally wasted just because of this government rules which is totally unfair I spent more then 3 year of my life and I thought I'll get a good future and smooth life in this Country and my parents also thought that my future will be bright in this Country and I don't want to disappoint my Parents. Last year on December 2009 I applied for my PR. According to your requirement I am doing a job in Restaurent from JAN 2007 and I am still working their and I worked according to your work visa conditions and also didn't work in any other field. My Aim is to be a good chef and open my own Business in Australia but now Government just take couple of hours to change or apply this rules but you should think once on the behalf of students that what will be happen with their future. We have done very hard work over here. **Just put yourself in our place and if same thing happens with you people then what will be your decision?** To fulfill your requirements I suffer day and night and sacrifice more then 3 precious years of my life and now it all seems to be wasted for me and for other students because of these rules, which are changing every hours without thinking about the people who will be most affected by these rules. **I belong to a middle class family and I don't have enough time to start any study and look a job for me because of my age I am already 28. Just because of your wrong decision \$17 billion Australian industry is at sake.** It is easy to make decision but it's really hard for those people who belong with this. I really worked hard day and night for fulfill your requirement, rent, collage fees, government fees, taxes,and stay away from my family and friends just because I will get a good future. Because of your requirement Teenage life is for enjoyment but I sacrifice all that for my better future not for worse. Why don't government think about the **QUOTA** before granted visas to the students, and still government are accept the applications just because of **MONEY????????????**. I m sure that you will definitely think about our future before making any disision.

JUST THINK ONCE THAT IN FUTURE WHICH COUNTRY, GOVERNMENT, LAW AND ITS PEOPLE WILL TRUST AUSTRALIAN GOVERNMENT??

**Your's faithfully,
Sahil kochhar**
