Honourable Senators, ABC Enquiry, Canberra

A brief submission to share my concern about the future of the ABC.

My wish is for the ABC to continue to be a producer of innovative, quality progamming. In particular:

- 1. It is highly desirable for the ABC to be less dependent on outsourced programming.
- 2. It is important to enable funding so that local programmes of high quality can continue; particularly

on TV and Radio National.

There is considerable concern that the Arts programmes are being considered for time reduction.

Overall the ABC should continue as a viable public broadcaster with a strong focus on diversity and quality

as well as local content - not ratings driven.

The ABC has the capacity to raise issues for public discussion in a way quite different to commercial TV

and radio stations.

The above are for your serious consideration.

Geoff W. Pryor.
