

hi sir/madam

i am overseas student . Name satwinder Singh, Ph-... . what is going on in immigrationn these days . every day new rules . i saw visa capping bill proposal . its really painfull. why australian govt. playing with student's future , all studying here with so many problems . they are working hard , concentrating study so on. if they will got australian permanent residency they can become australian bright future with their achievements . if they will work in australia, they will pay tax . so how can they are bad for australian economy . i am not understanding how they will reduce economy . and this bill took place as economy issue. australia is multicultural country and known as welfare country then how can they do this unfair with students those are here with positive hopes. i hope this bill will not be passed .
