

Submission:

“I write in support of rural wind farms.

Renewable energy is an essential part of our response to climate change, and, by a wide margin, wind power is the most commercially and technically viable form.

I do not understand the reluctance to move to renewable based energy supply. Ultimately it must be done, as no system of any kind can survive if non renewable resources are relied upon.

Start to think about the future of the planet and the species that exist upon it instead of the next election
