

## **Form letter 2**

Super trawlers are indiscriminate killers of the oceans. They don't care if they kill sardines dolphins Vaquitas sharks or coral. Its like clear felling a forest. Yay there is a lot of fish to eat but next time humans go to fish there is nothing.

How can you be so short sighted, you are meant to be intelligent people. Profit for profits sake is not healthy in any way.

Please don't OK the use of any super trawler in Australian waters. Set an example for the rest of the world and hopefully we wont be the only ones who say NO.
