

To whom it may concern

I came to Australia for studying in my profession because my brother was a citizen here. After studying a while, I found Australia a very nice country. People are so friendly and charming here so I decided to stay here longer. I finished my study in Nov 2007 and applied for residency in 2008 in subclass 886. I finished master degree here in Information Technology. When I heard about the news of capping Bill, I was totally shocked and upset. I was desperately waiting for the Residency so that I could pursue my career in a better way here. I just can't accept this unfair action the Minister is going to take. This is going to hurt badly and ruin the lives of thousands of people. We all wasted many years and energy to get the output we were struggling for. So please consider to review the decision for at least the pending applications which were in a queue for last couple of years. I will be very thankful.
