

Submission to the Inquiry on the Register of Environmental Organisations

This enquiry is driven by a federal government which is remarkable for its regressive behaviour and a mad devotion to the neoconservative ideology.

The defunding of the Environmental Defenders Offices was the first shot fired by these cretins. No doubt they have more of the same in store for people who actually care about where Australia is headed rather than the almighty dollar. Meanwhile corporate welfare is a goer.

I belong to Sustainable Population Australia which works to curb Australia's mad population growth which is driven mainly by immigration. The rentier class benefits from this insanity, nobody else.

I also belong to Lock The Gate which opposes Coal Seam Gas extraction and coal mining generally. Naturally the likes of PM Abbott, a confessed global warming denier, don't want this discussed let alone opposed. Again, the almighty \$ reigns supreme.

Both these organisations rely on tax free donations in order to operate effectively. And it is because this moronic government fears their effectiveness that they are attacking their presence on the register.

This enquiry should deliver a report which leaves the current government in no doubt about the error of their ways.
