

To my government representative,

the looming possibility of the legalization of the cannabis plant for medicinal purposes has me extremely excited and hopeful for the future. This plant is incredibly valuable for its plethora of medicinal properties with its ability to treat an incredible number of diseases such as cancer and anxiety.

All around me I see friends and family suffering from the pain of the scourge that is cancer affecting themselves and loved ones. This pains me so much as I know the cannabis plant has the ability to treat and cure this disease amongst others, and I simply have to sit back and watch as these people deteriorate into a shell of a human due to chemotherapy and radiotherapy. This also scares me as my family has had a long history of cancer, which leads me to think about the worst when it comes to my sixty three year old mother, who already has an auto immune disease which could be aided by cannabis oil.

If this plant was legalized, I would love to help friends and family by helping to create cannabis oil for them to fight their diseases and generally improve general quality of life. With the legalization of this plant, we as users need to be able to grow this plant legally for ourselves, to have control of our medicine and to be able to administer it cheaply and effectively.

Thankyou for your time, I hope you will make the right decision.
