

To whom it may concern, thank you for allowing me to express the disappointment in the parents next program. I find it to be a waste of funds and Resources within our system. Providers are nothing less then bullies who are ultimately targeting vulnerable women . We of course want the best for our selfs and children and being forced To sign participation plans To “ attended play group or swimming lessons “ is nothing less than humiliating . I can’t find the words to express my anxiety and stress in relation To the parents next program. I have several qualifications and over a Decades worth of work experience and yet I’m still forced to participate in a program that makes me feel like a second class Citizen .

Please stop the bullying And discrimination of women now .
Please stop Parents next And the provides doing horrible and irreversible damage to Family within the community .

Thank you
