

Hi,

I came here 2006 and It's my second home country...I spent 4 years in Australia.....I did my studies , work experience, pass English test mean fulfill all requirements according Australian Immigration to submit my application for Permanent residency.....But why Mr Immigration minister think now to terminate or capp visa application and did not on that time when I submitted my application.....I did everything according rules and regulation and guidelines from Immigartion.....

It's not fare with those who followed guidelines.....

They can stop receiving new applications for permanent residency but please don't take killing step for us who did everything according Immigration rules.....

I'm now 30 years old and live with my wife and we know how we build our house , we bought everything like your own house...It will be painfull if someone say leave this house and left everything here...It will like someone killing you.....Please do whatever you think but please for future applications.....I'm Graduate in Bachelor of Commerce, Post Graduate in computer applications.....and 2 year study in Australia Commercial cooking and Hospitality managemnet and I was always First in my class.....I'm educated person I'm not ILleterate and one thing why they welcome people who came via Boats.they offer them house, english, food , job.....they did not any contribute to Australia.....But why they allow them to Australia not to us who did everything good and in favour to Australia.....

In the end I request to please don't give powers to Immigration minister it will kill us.....

Thanks
