

Dear Sir/Madam,

My name is Gurjinder Singh and have studied Bachelor's of Accounting at one of the Sydney's University and currently enrolled for the Professional Year Program for Accounting. Now, I have been in the Internship process.

I have heard about the Senate's discussion about the **Migration Amendment (Visa Capping) Bill 2010**. If that has happened to me and all the International Students, there should be no scope for career and future for us in Australia. All the money as investment for our future (studies expenses, living expenses) approx more than \$50,000 has been spent on me by my Parents. Australia is a multicultural country a symbol of love and peace. I have planned my long term goals and settled my career objectives ass per Australia's life. My future as related to my studies will be ruined if that bill has been passed.

So, I please request you to please make sure that this Bill will not pass at the Parliament during the Third Discussion. This is just not about the studies and the investment that we have done here, but just for the sake of our Future, please avoid these kind of decisions and discussions.

I humbly request you to ignore this new Migration Amendment Bill 2010 and think about the future and career of the students. And make rules which will let the students go to their occupational professions. Thanks for reading this mail for the sake of students.

Yours faithfully
Gurjinder Singh
