

Answer to question on notice:NSW Irrigators Council

Question:

Can you outline research that your organisation has conducted in relation to the issue of Coal Seam Gas mining, particularly with reference to any industry or academic partners? Was this research independent?

Answer (15 June 2012):

To the best of my knowledge, NSWIC has not conducted or commissioned any research in relations to CSG or mining either alone or in concert with others. We have provided a delegate to the Namoi Catchment Water Study (Mr Bernie George) and a delegate to the NSW Sustainable Rural Land Use Policy Stakeholders Group (Mr Arthur Burns).
