Dear Committee Chair

RE Letter of Support for the Wind Energy Industry

Thank you for the opportunity to offer positive support of the Wind Energy Industry in our local community.

We at Safety Ba6 Training and Development are primarily involved in Occupational Health and Safety training and auditing. In recent year we have enjoyed involvement in wind energy projects throughout Victoria and interstate, for various project management organisations.

Ostensibly I write to offer general support, however I fervently believe the wind energy industry to be directly responsible for three positive outcomes, namely:-

- local economic growth,
- global safety standards increasing the knowledge and professionalism of local contractors,
- opportunities for regional communities to directly contribute to a solution component to global warming effects and contributing to environmental conservation.

My support for the Wind Energy Industry is such that I would be willing to address the Community Affairs Committee in person if necessary.

Kindest regards

**Rohan Arden
Managing Director**
