

Sandi McDonald

This is a disgrace to what these companies and people are doing and trying to protect. This part of Australia's heritage and part of our country what we love, our lands, our environment our air we breathe. To do this will stop the peoples and companies from helping and raising funds to protect our natural heritage places, water ways, forests, barrier reef and oceans.

What is this government doing, it's all about money, you are greedy greedy unscrupulousness men and destroying our beautiful country by doing this soon our children and grand children will be living in the slums like the poor people of India, the pollution of Pakistan people and deforestation like Malaysia has, all as a result of what you are doing now.

I am disgusted and feel sick to the stomach to say I am Australian.

Sandi McDonald
