

Submission to the inquiry supporting the implementation of age verification in Australia.

I support establishing age verification for online wagering and online pornography.

We need to protect Australia's children from gambling and the objectification of women, men, young boys and girls which gives people who view porn a rotten start to their own sex lives. Our society is too over-sexualised and this would be one step towards creating a society based on mutual respect instead of exploitation and sex-trafficking.

A robust, enforceable system would provide a mechanism for going some way towards protecting minors online.

Thank you for reading this submission.

Anne Weeks
