Please accept this public submission

My submission is simple. I am a grandmother who wants a future for not just my own grandchildren but the multitudes of children and their posterity that come after us. Therefore, I am supportive of a nuclear power industry for Australia. Australia must lift the ban on nuclear power!

Peaceful use of nuclear power is not just desirable but absolutely necessary for clean, plentiful, cheap and reliable baseload power. Nuclear power is more energy dense than any other energy currently available. We face an existential crisis without nuclear power!

Nuclear waste is merely a political football, not natural. It is highly desirable and profitable to reprocess spent fuel rather than having unnecessary 'waste'.

(No to nuclear war, no to nuclear weapons) but YES to nuclear power!

Janet Pukallus
