

*Re: 2024 amendments to the International Health Regulations 2005*

*I oppose the 2024 International Health Regulations for the reasons given below:*

*Parent organisations such as the WHO and UN have been shown to be corrupt and useless.*

*Nobody needs these quacks who along with the crooked TGA ban useful, well understood medicine in favour of insane mRNA experiments.*

*No meaningful investigation into the lies and fraud of the UN, WHO and TGA has yet taken place.*

*No convincing case for these International Health Regulations reforms has been proposed. The proposals should be abandoned.*

***Australia must expressly reject the 2024 IHRs by or before 19 July 2025 and I trust that JSCT will make that recommendation.***

*Yours etc.*

*H.G.Stenbo*
