14th December 2023

I, Daniel Michael Blogg, of 1218D Wallangra Rd, Wallangra NSW 2360 Australia, object to the amendments that give away powers and allow central bankers to control and dictate terms and conditions to me or any other human being whether in this country or any other country around the world.

How is it democracy is being usurped in front of our eyes and all the humans in elected positions of representation to the various electorates around the country are being force fed lies to justify the madness of giving up power that protects the people from abuse of power within the central banking system?

There are books published by those pushing this global agenda and their books reveal all the truth of their agenda, and the agenda is not a peace loving world that we all share, no it is a world of deliberate chaos so they can dangle a solution to the problems they first created.

Isn't that akin to giving a murderer reign of the court and proceedings of their own trial? Not guilty for every murder they commit because they are holding the gavel and abusing their power.

This madness that is Central Banking Digital Currencies (or whatever sugar coated work combination chosen) can not function when there are failures in the electrical grid, which happens (even without major catastrophes). Only last month in November I was unable to do the grocery shopping because the banks system failed, no money from the ATM, no Eftpos machines working, and I had to shop for food and other essentials that day.

How do you propose to make a digital currency work through ALL electrical issues, cyber attacks, etc. FIAT currency is a banking family scam that took currency off gold standards to purposely inflate currencies (not money as it has no tangible value) for the purpose of funding wars that people did not want, which today we can see leads to the wholesale murder of humans no matter which side someone may choose in the conflict/argument.

The definition of insanity is to repeat the same thing expecting a different result. This pursuit of WEF policies that are manufactured by those with exorbitant amounts of currency through this corrupt system. Enough is enough, the insanity must stop. A decentralisation of the banking system is required by offering an alternative currency that is backed by gold and/or silver. Bitcoin is already a digital money that works and many others are available also. No one needs to be forced or funneled into a central digital currency which is a monopoly and monopolies have no place in democracies!

All the politicians supporting this are traitors to humanity, and our future generations will not look upon you kindly for the deception you played part in to control and enslave fellow humans so that you can have a 'better' life.

Meanwhile, I am now dealing with money grabbing local council who want to force a zoning change through an application for that if not filled out, will lead to new zoning, increased rate charges and no extra service for the landowners. How is this supposed to help the humans with less than the banking families and the parasites that are willing to bleed the rest of us for a better piece of the pie in the pyramid scheme of central banking.

Disgusting, and I already emailed Chalmers directly saying as much.

When I was growing up through the 80's and 90's, what we have today was being sold as the solution to our problems, that life would get better. That was all a scam. I do not see our government blindly supporting Israel and America and any other elected countries official vetoing ceasefires and making the most absurd excuses to justify the murder and genocide of people who's land was stolen from them in a move made by again elected officials of other peoples countries interfering.

Ceasefire to all wars, stop funding arms and weapons, stop selling them to murders with a lack of humanity that would make the devil blush. Stop the fraudulent FIAT banking scam and give the people of Australia a money system that can not be corrupted by individual agendas of those with an accumulation of more money by bring back the gold/silver standard. We dig enough of it up out of the ground and the expense of the original humans living here before the current occupation.

How about telling the King of England it's time for reparations. The same King who would describe humans as a virus, making out some of us are not as worthy of others. We are all worthy of life, we would not be born otherwise. It's about time the politicians grew a spine and told the King to open up those vaults of stolen wealth over many generations and pay the reparations owed to the original humans of this land.

In good faith that humanity will prevail and insanity will fail.
