

---

As a member of the colac community I think the budget cut in our health care system are a disgrace, so much money is wasted each year on non-essential projects and what for? We need our urgent care department running round the clock. People get sick, have heart attacks, falls, etc. As a mother with a young child who suffers badly with croup, asthma, and severe peanut allergies we have personally needed urgent care a lot in the last 2 years and not one of those visits happened before 10 pm! A lot of children suffer some of these conditions and worse. What would happen to any of us if a life-threatening event was to arise? An hour drive can be too far in a lot of these cases! I am very worried for the people of this town and surrounds that by the time we get funding, if ever, it will be too late people will die. Remember we are not a little outback town, Colac is expanding, we need urgent care.
