

Dear Sir/Madam,

I am writing in support of national container deposit legislation.

This proposal has many benefits and few disadvantages. It would improve Australian's recycling rates, reduce our ecological footprint, reduce our CO2 emissions, support the recycling industry and reduce pollution and litter.

A national scheme would also support local government efforts in recycling and help bring some consistency across jurisdictions.

This is an important proposal which must be given full consideration by our elected representatives sooner than later.

Yours sincerely,

Mark Riley
