De-forestation in koala habitats

Dear Friend,

We have just heard that the NSW Environment Department under the NSW government is set to log 2,000 ha of land around Coffs Harbour, which is well-known as prime koala habitat.

Someone must be joking!

If not, then it is a foolish and bad idea, so on behalf of all Australians of any age, we would ask you to please reconsider!

Kind regards,

Lincoln and Rebecca Young

Foolish – because of the loss of tourist revenue, and also because the Japanese whalers are no doubt waiting for an opportunity to call us hypocrites; and Bad because it just is!
