Memo Malcolm Turnbull: Don't stuff up NBN

ALAN KOHLER | THE AUSTRALIAN | MARCH 18, 2014 12:00AM

SAVE

I'VE spent a lot of time writing about the politics of the NBN over the past few years. This time I want to write about the reality of it, for the customers and the resellers.

One of the 375 postcodes in Australia that now has the NBN connected is Brunswick, an inner Melbourne suburb.

Paragraph 222:

Mr Ergas... appeared reluctant to respond to questions whose answers **might have been adverse to the case** put by the party calling [him].

[Mr Ergas] provided non-responsive answers and deviated to discussions of other issues which supported the case of the applicants.

Such an attitude and conduct of an expert witness leads to a conclusion of partiality and an inability to express an objective expert opinion upon which reliance can be placed.

Paragraph 211:

His (**Mr Ergas'**) evidence provided **little real illumination** of the extent of the public benefits that were said to arise from the Alliance.

In his attempt to quantify these benefits, **his method and explanation left much to be desired and lacked clarity, detail and transparency.**

Accordingly, **we place little weight on the precise quantification of benefits presented by the applicants.**

Economist Henry Ergas, one of the fiercest critics of the previous Labor government's policy on the national broadband network, will on Malcolm Turnbull's NBN analysis panel. *Photo: Nic Walker*

Professor Ergas has been one of the fiercest critics of the previous Labor government's plans to spend \$37.4 billion running fibre to the front doors of homes and businesses across Australia.

Mr Ergas said he had handed out Liberal how-to-vote cards at the recent election, but said his Coalition connections would have no bearing on his ability to give independent advice if he were appointed to the NBN panel.

Professor Ergas said it was a good thing that he participated in "community life" by supporting successful Liberal Senate candidate for the ACT Zed Seselja.

Libs should dust off Ergas's review

GLENN MILNE | THE AUSTRALIAN | JUNE 01, 2009 12:00AM

SAVE

Not much has been known about that and the reasons have a lot to do with internal Liberal Party politics. It didn't have a propitious start. **What's not widely known is that Turnbull, ambitious for the leadership in April 2008** and already impatient with what he saw as the terminal leadership of Brendan Nelson, **launched the Ergas options review without even informing his leader.**

Nelson was very wary of what was in it. He presented the report to the shadow cabinet and they decided, in the words of one frontbencher, to "let it out on a day when all the focus was on Labor with an immediate disavowal of some of the more controversial elements".

That day never came. Nelson lost the leadership to Turnbull a matter of months later and the Ergas "theoretical issues paper", as Turnbull now refers to it in internal discussions, **remains locked in the shadow cabinet safe.**
