
Response to Questions on Notice: Senate Economics Committee Hearing on the National Reconstruction Corporation Bill 2022

Senator BRAGG: Have you heard feedback from your members, concerning the closure of the Modern Manufacturing Initiative? Has this impacted sector confidence?

Response: As the Tech Council's membership is primarily comprised of software companies, rather than hardware manufacturers, we have not received feedback from our members concerning the closure of the Modern Manufacturing Initiative (MMI). We note that our membership largely works outside of the 6 priority areas identified under the MMI.
