

This is a disgusting and terrifying bill.

How can the people who are sworn to protect us think we are so stupid to believe the tripe on TV? There is no terrorist or no gang threat that is more of a danger to this nation than the politicians who claim to take care of it.

The right to lawful protest is integral to any nation that declares itself a democracy. It is obvious that the long game is to erode public opinion and protest as people are often only captured by what affects them directly.

They cannot fathom the future implications of this bill. But the people running it can. And I do not suspect that they have the nation's best interests at heart.

This is a fearful and unlawful bill. This is a bill designed to promote hate, bigotry, racism and violence. This bill is designed to vilify those who would stand up for ethics and basic rights.

You have children withering away on an island because of the people running this country. You cannot be fooled for one moment that there is a shred of kindness or consideration for safety and well-being in their motivation for this bill.

This is Dutton's wretched and malformed child. This is the creature of hate he wants to nurture during his time of influence. His time will pass, but this child will grow and influence other laws and the people of this nation will wither and become docile wretches. That is what this government wants. It cannot be allowed to occur.
