

To whom it may concern,

I oppose the Migration Amendment (Visa Capping) Bill 2010.

Firstly, as all known, a sustained, rapid and sound development of the economy is based on the associated effort of all people from every field. You never know which occupation of an applicant who will be "Cap" is NEVER NEEDED in the future of Australia which is on the up-and-up.

Secondly, today the problem is a slow speed of GSM visa processing which was caused by the bugs of the GSM program, could not keep up with the need of the Human Resources Market, so the way to solve the problem is to give more paths for applicants to adapt to the need of the Human Resources Market but not by raising standards of GSM applications hourly and blindly. And "Cap" can do nothing with the problem.

Finally, as the Bill mentions, the large numbers of the caseloads of Cooks and Hairdressers was caused by the absolute priority of CSL, a reasonless direction of the Minister of IMMI. So giving the Minister more power will not avoid any reasonless direction which would affect the economical development and the international image of Australia.

Every applicant lodged their valid application with passion and dream, so they would like to put their heart and soul into participating in the development of Australia no matter Cooks they are or Engineers they are. So, I oppose the Bill, same as all applicants who yearn towards a better future of beautiful Australia.

Yours faithfully,
Lim Song
