

To whom it may concern,

Farmers have had it tough long enough. If milk is sold for this price then the Farmers will eventually get paid less because the "supermarkets " will still want the same profit margins. If this continues to happen no Farmer will be able to sustainably produce raw milk and remain viable at the prices they get paid per litre of milk. Hence more foreclosures on more properties, More people out of work, and major economic challenges for small towns that rely on these businesses.  
IT NEEDS TO STOP!! So please do something about it!

Thankyou for your time,

A. Peterkin
