

Wind farms affect your health

Joe Helper and the Brumby government are destroying the lives of working families in country Victoria by putting industrial wind turbines dangerously close to homes.

Hardworking, long-time rural families are being forced from their homes and can only watch as the value of their most precious asset is destroyed.

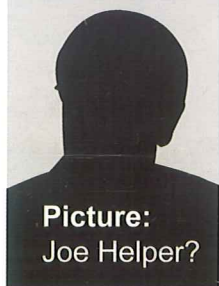

And all for nothing: peaceful rural lifestyles are being blown away by the Government's cruel and mindless pursuit of wind energy when better options are available- options which don't threaten people, communities and ecosystems.

where is
Joe Helper?

the absent
Joe Helper

he must be in Melbourne
cos' he's **NOT** in his **electorate!**
