Subject: "No jab, no pay" legislation
Date: Friday, 18 September 2015 3:38:31 PM

I wish to speak to those involved in allowing or blocking this legislation.

Please consider that coercing the community by withholding funds from parents of young children who choose not to vaccinate will cause damage to our civil liberties and mistrust of the government.

Please note that the 'proven science' of vaccines' broad benefits is arguable with research showing lack of safety firmly established.

As you would know, vaccines are not required to adhere to the comprehensive safety protocols of other pharmaceuticals.

Also, many notable people in the medical community have verified this concern e.g

<http://www.globalresearch.ca/editor-in-chief-of-worlds-best-known-medical-journal-half-of-all-the-literature-is-false/5451305>

- the 'herd immunity theory' is just a theory and as with any theory not, in my view, a good foundation to base public policy.

What I suggest instead of the 'no jab, no pay' legislation is for the government to invest in safety protocols and research around vaccines to address the concerns of the people who don't vaccinate have. This would be the only way you would sway me to vaccinate my kids.

Thank you for your time,

Eliza Blackwood
