

Dear Senate committee,

This is only a recommendation or request but I think it important to have representation from a few key assessors working with the senate committee while the hearing is in progress.

I offer my services as someone who has invested heavily and lost heavily. There are only a few people with knowledge of exactly what went wrong on all levels and I am one of those people. I have done a lot of research and spoken to most of the key players.

One important point to mention is that since the 19th February, hundreds of people are without support, without money and at least another month or two before any resolution is even possible. I am concern for the well being of some individuals that I am aware of who have lost everything and probably need immediate counselling provided by the Department as a gesture of "good will".

The department to date has offering no assistance or claimed responsibility for any of their actions to this group. Any further consequences I fear would be disastrous to the Department in reference to my above concerns.

Once again, this is only a recommendation and hopefully I have highlighted some valid points which have not yet been approached and accept them in good faith as they were intended.

Best Regards

Phil Press
