Subject: Submission - Telecommunications and Other Legislation Amendment (Assistance and Access) Bill 2018
Date: Thursday, 27 September 2018 11:11:28 PM

This Bill is a mockery of good government and is the crowning achievement that directly results from government incompetence, dereliction and failures with respect to immigration policies that are driven by dogma, that sees immigrants drawn from an ineligible pool that subsequently extort money from taxpayers for 'de-redicalization' purposes.

Just as the government is now expected to pay certain citizens to observe Australian norms of behaviour and domestic laws, Victorian law enforcement demands that victims pay, by invoice, for police protection because of their institutional approval of widespread thuggery, free speech suppression and general totalitarianism.

Who has brought this upon our heads? Government incompetence, madness and total dereliction. You are all bankrupts and degenerates and have presided over the subversion of the Australian body politic in the name of 'multi-culturalism' that is merely a specious concept of self-destruction.

Coherent societies may have multiple ethnic participants but have a common obedience to a homogeneous culture. Any other variant involves the importation and toleration of subversion and invasion by stealth. What else is sovereignty and self-determination?

You are all fools and the delivery to this point of the draconian and invasive elements of this legislation proves it.
