

The proposed bill is very un-Australian.

As a media person I know that this bill will get Australia a lot of bad publicity across the world. What we are doing here, can be termed as the biggest consumer fraud running into billions of dollars. When we needed the money, we sold Australian migration potential to these poor students by creating the GSM visa class and giving a free hand to the colleges to recruit students on the basis of their migration prospects. Now we are changing the conditions. Legally this is breach of contract. Which can be challenged in the court and it will be very soon.

Mr Laurie Ferguson's bill is politically motivated. Why he was silent when he was representing and winning from a migrant dominant seat? All these students have been coming for many years, but Laurie was silent! Now that he has moved to a non-migrant dominant seat and he has proposed this highly un-reasonable and unjust bill.

This bill should be defeated.. or Australia will be dubbed as a financial cheat..
