

JOINT SELECT COMMITTEE ON AUSTRALIA'S IMMIGRATION DETENTION NETWORK

Q21

Question: Please provide copies of:

- a) all Incident Reports received by DIAC from SERCO since 1 January 2008.
- b) all Incident Reports received by DIAC from IHMS since 1 January 2008.

Answer: a) According to departmental records, the Department of Immigration and Citizenship (DIAC) received 9,157 incident reports from Serco over the period 1 October 2009 to 30 June 2011*. Departmental records indicate that DIAC received 1,869 incident reports from G4S over the period 1 January 2008 to 31 January 2010#.

The department estimates that it would take a departmental officer approximately 919 hours of work (this is equivalent to around 25 weeks of work for a full time officer) to extract all reports from the system as each report needs to be extracted individually.

For this reason, the department has instead produced a summary table of all incident reports received from the detention service provider from 1 January 2008 to 30 June 2011. The table lists the following variables: incident number, incident type, incident level, date, location and who reported the incident.

It should also be noted that each of the individual incident reports contain personal identifier information on clients in detention. The Secretary has addressed this issue in his letter of 5 August 2011 to the Committee Secretariat.

* Source: Compliance, Case Management, Detention and Settlement Portal (CCMDS) – Current system of record for all compliance, case management, detention and settlement cases.

Source: Immigration Services Information System (ISIS) – Legacy system used to record information relating to persons detained in immigration detention facilities administered and operated by the former detention service provider, G4S.

Note: On 29 June 2009, DIAC entered into a five-year contract with Serco Australia Pty Ltd (Serco) to provide services at immigration facilities. Serco took responsibility for detention service provision through a staged approach beginning on Christmas Island on 1 October 2009. The transition from the previous detention service provider, G4S, to Serco was completed on 31 January 2010 when Serco took responsibility for managing all immigration detention facilities on Christmas Island and mainland Australia.

b) The requested Incident Reports contain personal identifier and medical information on clients in detention. The Secretary has addressed this issue in his letter of 5 August 2011 to the Committee Secretariat.

**JOINT SELECT COMMITTEE ON AUSTRALIA'S
IMMIGRATION DETENTION NETWORK**

Q21

A copy of all IHMS Incident Reports for the period January 2010 to mid July 2011 have been retrieved. IHMS Incident Reports for the period January 2008 to December 2009 are not able to be retrieved in the timeframe given, because these incidents occurred prior to changes to the IHMS reporting system that enabled electronic recording and recall of incidents. Incident Reports prior to this were created manually and individually attached to each client record. Considerable resources would need to be deployed to manually retrieve these reports.

Incident Summary Report for ALL CENTRES from: 01/01/2008 to 30/06/2011				
Note: Under the G4S – ISIS records Incident “Types” are recorded against set categories, for example, “Accident”, “Media”, “Damage to facility”, etc. The Incident Type category “Escape from an immigration detention facility (includes mass escape)” covers all escapes regardless of the number of escapees, it should be noted that mass escapes have been rare in the detention network.				
Incident Number	Incident DateTime	Type	Incident Level	Location
GSL-Baxter				
BX08-1	29/05/2008 12:32	Escape from alternative place of detention - Successful	Critical	House 41A Britton street Adelaide APOD
