Dear Sir or Madam:

My name is ..... I came to Australia in 2006. The reason I came to Australia was job opportunity, diverse culture, a hope ‘ I can settle my life I will become successful’. I spent about $25,000+ $15000 for study and other expenses. I had bear mentally, physically harassment, discrimination. But I still didn’t lose my hope. Lots my friends said to me when I was studying if I pay that much money I can finish my study early and I will get my working experience and I will be permanent resident very fast and easily. But I said I would follow all the rules regulation. I would not do anything illegal. So I didn’t work more than 20hours a week, did work on less pay. And I am still waiting for my approval for my application. People who did everything illegally they are successful they got Australian passports, PR. They are people came after me. I did every single thing according to Australian rules. If my application suspends I have nothing but one option ‘suicide’.

The money I paid and time spent

Education: - 25000+ 15000 living expenses +2.5 years

485visa: - 200 application fees+ 3times medical examination 800+ other documents 500 and spent about 19 months for approval

PR application: - 2900 application fees. Medical, police clearance, English test and other expenses 1000.

Migration agent fees: - 2000

Total $47000
And the time I spent which 4.5 years of my life and went through lots mentally, physical pressure, stress, worked so hard.

Thing upsets me people who cheated they got what ever they want. People like worked hard followed what they are getting suspension of there application. Some people never worked in their field. They became PR on basis of that.

I would I like you suggest one thing. Inquire their paper work properly. If something wrong cancel their application. And if someone did right thing they deserve to be here. Give them chance. There should be system in place that people do wrong thing catch them refuse their application, people who done right thing there should not be any obstacle in their ways. We spent huge amount of money and time. Help us. Do fair
