

To whom it may concern

Here is the request from all the international students that please consider our feelings and career and do not dump our life like a rubbish. We spent a lot of time here in this country and have got a real attachment and are used to it now. we promise that we are and we can be a positive contribution to the country. If the Australian government is scared from paying the doles and free medical facilities to the unemployed people in future after granting permanent visa, we all can sign and promise that we don't want anything from the government. we all are hard working people. we just want to become a part of this country. we are not criminals. we are like Australian kids too. seeking a bright future and serving a country is not a wrong wish. we can serve Australia in a best possible way and can be and are a well contribution to it. Please consider our feelings and a career as it will be spoiled if the visa capping will affect. It is not fair that keeping asylum seekers here and sending all the skilled and educated students back. Australia got huge land to live. if you don't want cooks, hairdresser or any other type of skill, please send us in country towns. we will be away from metro cities. we'll open new business there and can create employment for Australians. On a temporary bridging visa we cannot take any loans from bank and cannot start anything. can't even loan for a car. if we want to find a new job, Australian employers ask if we are permanent residents here. Please think once how you can use us. we'll together boom Australian economy. In the last we would like you to request again not to pass the bill and stop zigzag play with hundreds of lives.

kind regards,  
International students
