

I am a 71 year old Australian citizen who is anxious to leave this planet in a habitable condition for our future generations.

Nuclear energy is an old, expensive and hazardous form of energy outdated by new safe and non-polluting technologies of today.

Before you make a decision on lifting the ban on nuclear energy, take a good hard look at 'Windscale' UK, Chernobyl Russia, Fukushima Japan, Three Mile Island USA etc.

The legacy this technology leaves behind will pollute for tens of thousands of years and cost untold billions of dollars in clean-up attempts.

Solar, Wind and Batteries are the only clean energy sources we need.

You will be judged on how you vote!
