

dear,sir/madam.

i am currently holding general skill migration with 885 visa category. i think that the senate enquiry that means DIAC intend today to enact legislation is very unfair to us. Such as we spent lots of money to study and grow up here to help this country and now a times to going home. so, that means when you need us then you use us. but now your time to save us. if you doing this kind of thing then it will be major affect to your economy(import,export, population,experts) then your dollar will go down.
