The history of drug use in Portugal

1970 / 1974

It began much latter than in the other Western European Countries

Closed and isolated country

Citizens' limited mobility

Colonial war

Society unprepared for this new phenomenon

The history of drug use in Portugal

1974 / 1985

It happened with relevance only after the Portuguese Democratic Revolution (1974), when society was facing deep and accelerated changes:

- Association of drug use to the concept of freedom
- Return of soldiers and settlers from ancient colonies
- Interesting emerging market for criminal organizations – availability of new substances
- Generalized experimentation
- Easier shift to other drugs by lack of information
- **Fast diffusion among all social groups** and more impact among the socially excluded

The history of drug use in Portugal

As a consequence:

- It developed very fast
 - **society was not able to answer timely and to tackle the “new needs” created by drug use; as a consequence, for quite some years there was a gap between “needs” and “responses”**
-
- Drug use spread, still under European average level
 - But a considerable number of “problematic drug users” appeared and, during a long period of time, had no access to treatment
 - Small gap between “total” and “problematic” drug users
 - Onset of AIDS and HCV epidemics
 - By the end of the 20th Century, Portugal had one of the highest prevalences of Problematic Drug Use, at European Level (1% of total population -100 000 problematic drug users)
 - At the same time, the social burden associated to drug use was very relevant – major political concern

The history of drug use in Portugal

1975 / 1998 PUBLIC RESPONSES

1975 Ministry of Justice: **treatment centers – 3 major cities**

1987 **Projeto VIDA** - Cabinet of Prime Minister

1987 **Centro das Taipas**: Lisbon

1990 Ministry of Health: **SPTT : approx. 40 treatment centres, nationwide**

- 1993**
- Decree Law 15/93 ("Drug Law")
 - Needle and Syringe Exchange Programme
 - EMCDDA implanted in Lisbon

1997 Law 7/97: defines **public network of treatment**: inpatient and outpatient treatment centers, nationwide coverage, public and private units

National Strategy on Drugs 1999

A New Paradigm

Decriminalisation of drug consumption and possession for use

Portuguese Drug policy was based on consumption's criminalisation

Imprisonment or fee (the most common sentence imposed on 1st time offenders) didn't deter drug abuse

In the case of 1st time offenders or occasional users, imprisonment is likely to generate counterproductive effects

Need to liberate resources for the fight against drug trafficking

PRINCIPLES

Humanism

Recognition of the drug addicted citizen's full dignity as a human being, that should be understood within the framework of the complexity and relevancy of his/her individual, family and social history, and must take into consideration the health and social conditions

PRINCIPLES

Pragmatism Value is granted to an attitude of openness towards innovation, rejecting dogma or pre – conceived ideas vis a vis scientific proven results of experiences conducted in the different domains, leading to the adoption of adequate solutions to the national reality, that may offer positive concrete results

National Strategy on Drugs 1999

A new Strategy (1999)

A National Coordination structure

A new Paradigm (Law 30/2000)

A new Structure: coordination and implementation of policies - IDT

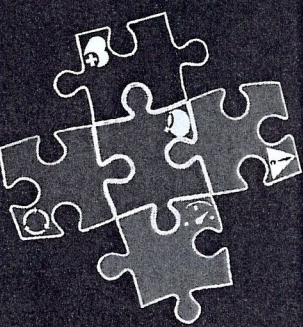

A new Model for intervention (+ Dissuasion)

National Plan to Reduce Addictive Behaviours and Dependencies 2013 – 2020

Cross-cutting Areas

- 1 Coordination
- 2 International Cooperation
- 3 Information, Research, Training and Evaluation
- 4 Legal Framework Review

Mission Areas

- 5 Demand Reduction
 - Prevention
 - Dissuasion
 - Harm Reduction
 - Treatment
 - Reintegration
- 6 Supply Reduction

National Coordination Structure

Law 30/2000

The consumption, acquisition and possession for own consumption of plants, substances or preparations constitute an administrative offence and can not exceed the quantity previewed for individual use for a 10 days period. Exceeding this quantity, criminal procedures take place

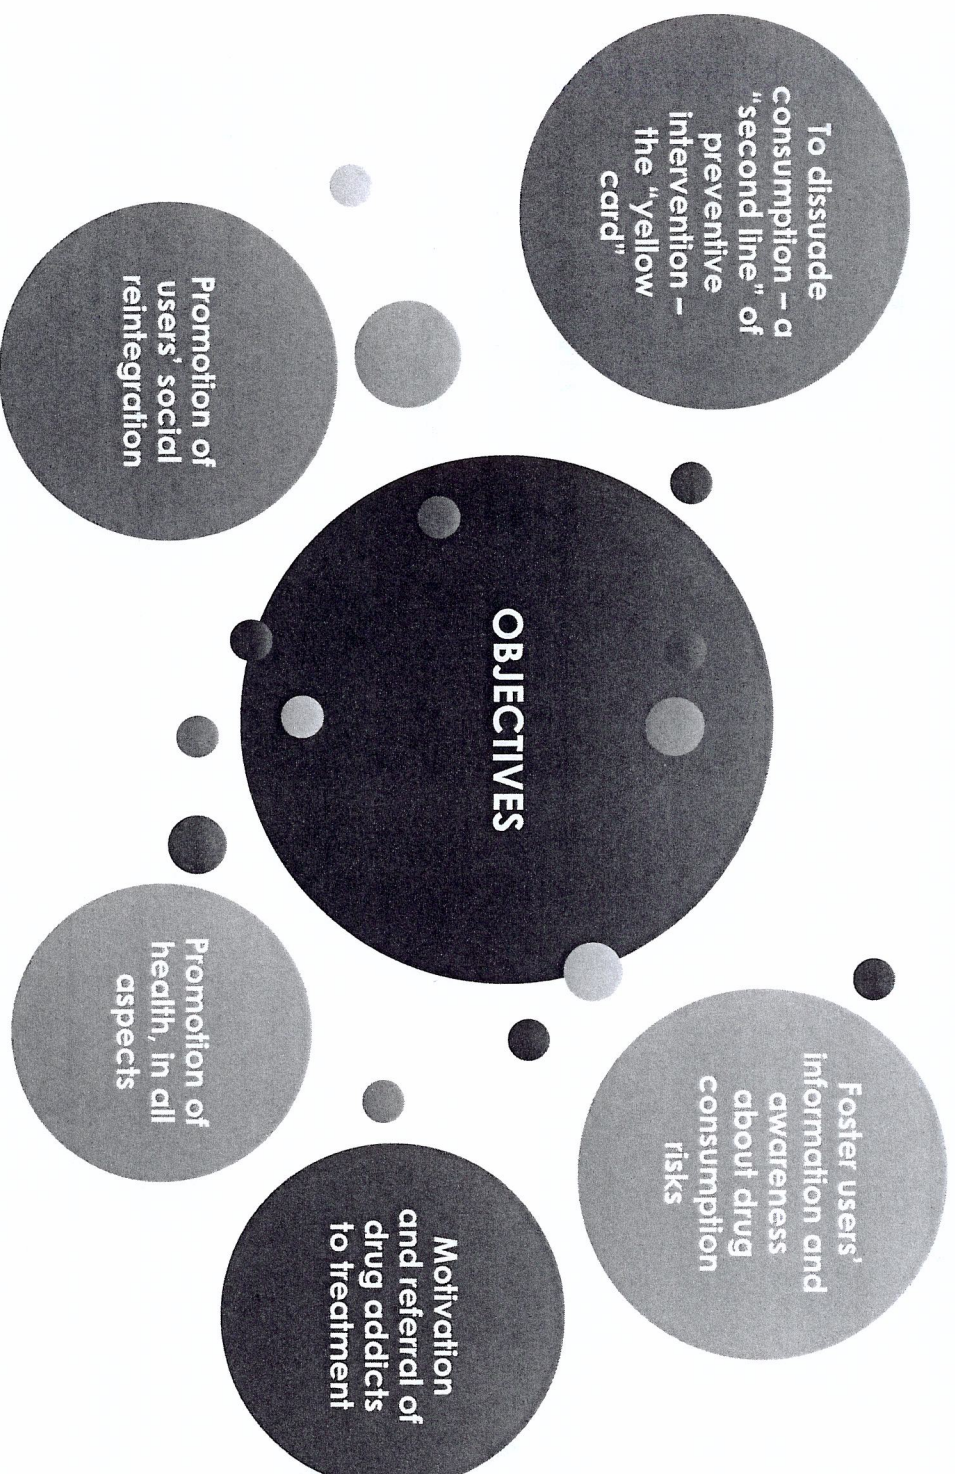

The drug addict is considered a person in need of health and social care

The dissuasion intervention provides an opportunity for an early, specific and integrated interface with drug users

The dissuasion intervention is aimed and targeted at the drug users' characteristics and individual needs

ILLICIT SUBSTANCE	GRAMS
Heroin	1
Methadone	1
Morphine	2
Opium	10
Cocaine (hydrochloride)	2
Cocaine (methyl ester benzoilecgonine)	0.3
Cannabis (leaves and flowers or fruited dons)	25
Cannabis (resin)	5
Cannabis (oil)	2.5
LSD	0.1
MDMA	1
Amphetamine	1

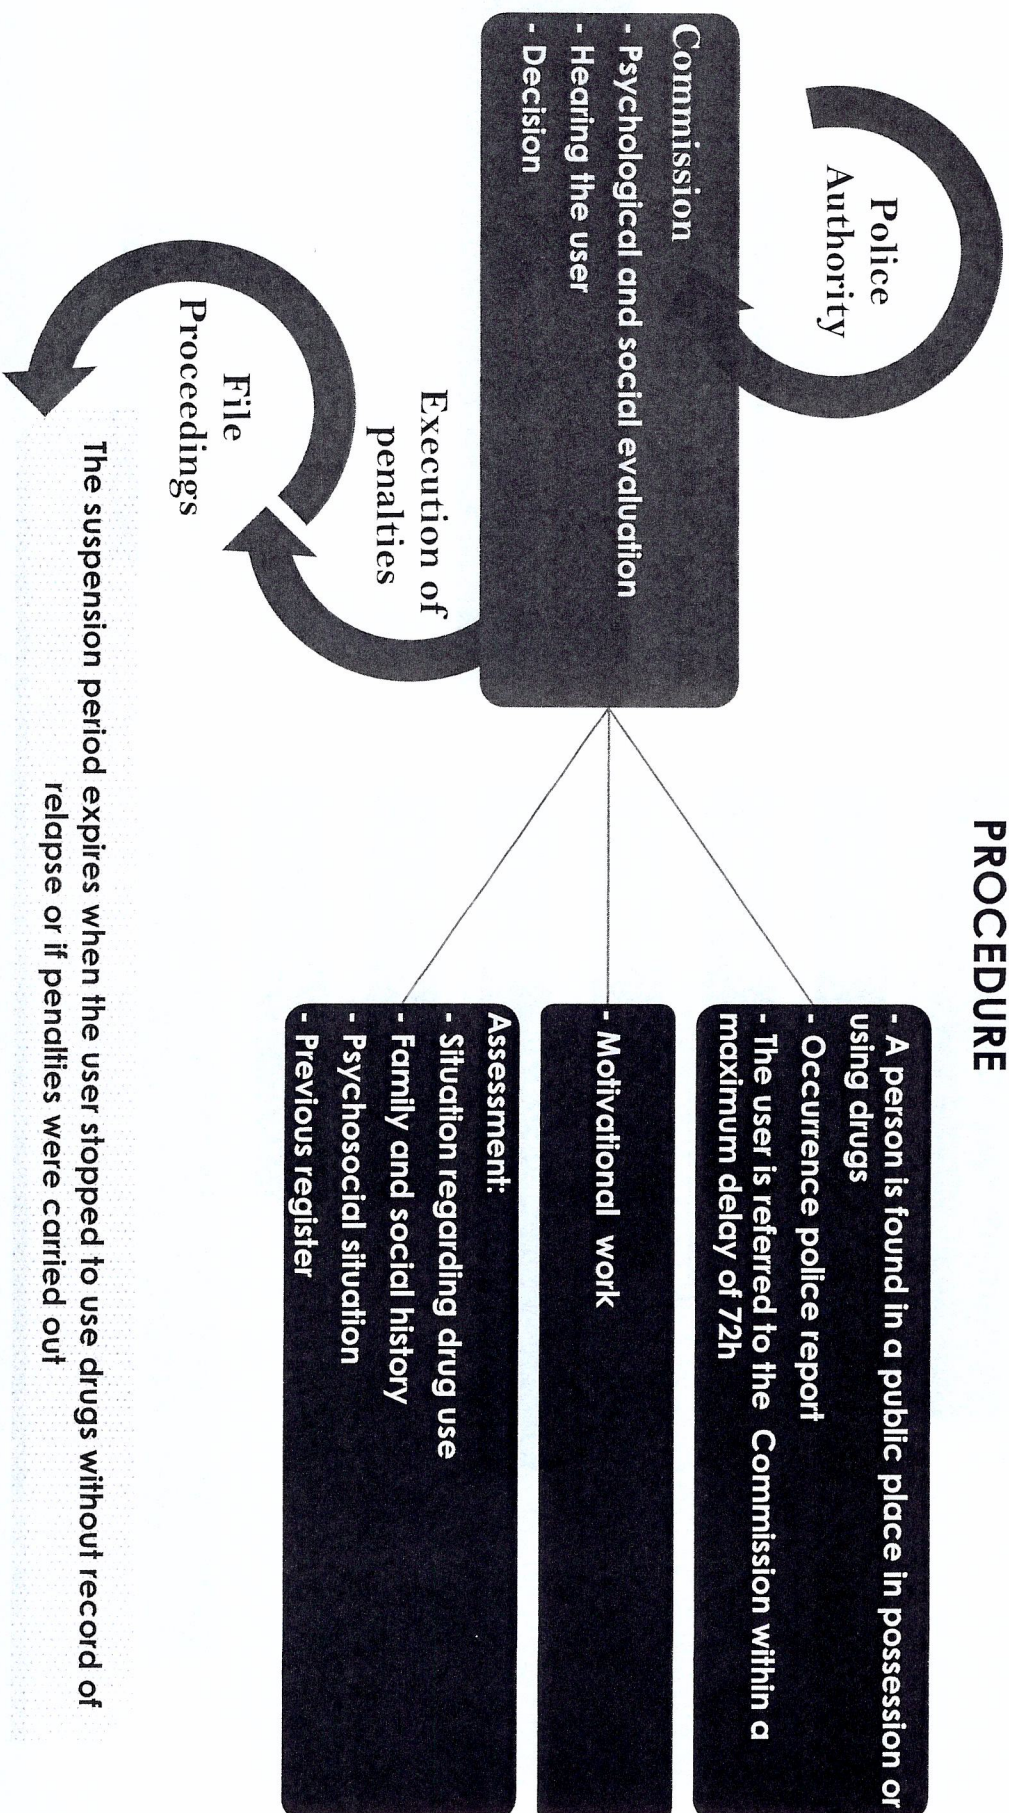

Dissuasion

Dissuasion

PROCEDURE

Police Authority

Commission

- Psychological and social evaluation
- Hearing the user
- Decision

Execution of penalties

File Proceedings

The suspension period expires when the user stopped to use drugs without record of relapse or if penalties were carried out

- A person is found in a public place in possession or using drugs
- Occurrence police report
- The user is referred to the Commission within a maximum delay of 72h

- Motivational work

Assessment:

- Situation regarding drug use
- Family and social history
- Psychosocial situation
- Previous register

Dissuasion

DECISIONS and SANCTIONS

Provisional Process Suspension

if suspension conditions not met or if citizen refuses to engage with measures determined by the Commission:

Periodic Presentation to the Dissuasion Commission

Admonition, Warning

Community Service

Forbiddance of attending certain places or meeting certain people

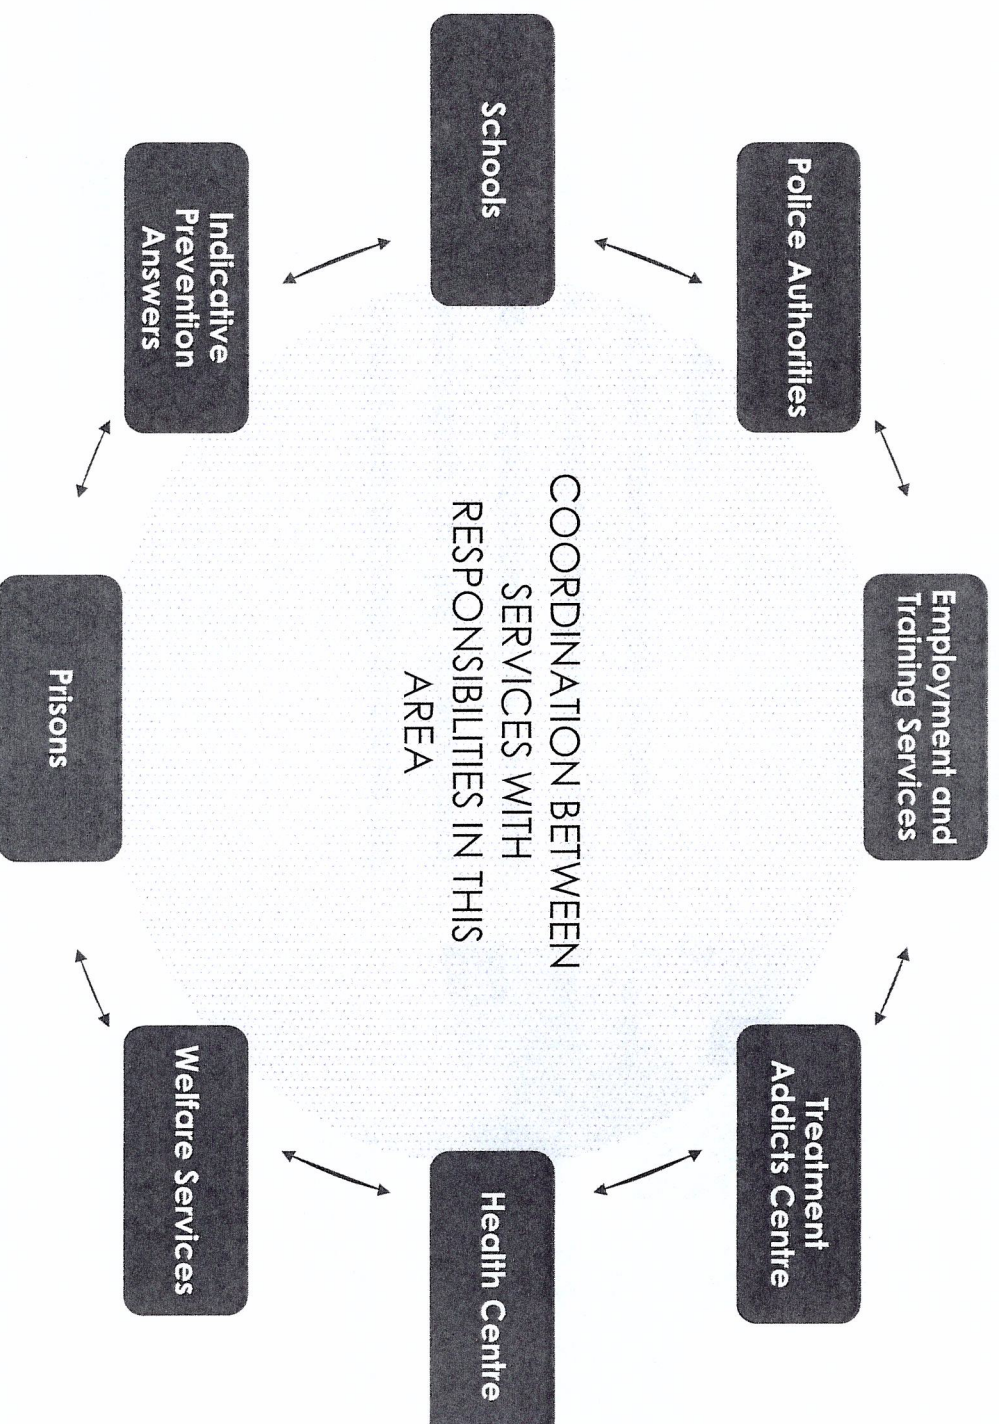

Apprehension of objects

Interdiction to travel

Interdiction of receiving subsidies or other monetary social grants

Monetary fee (only for non-addicts)

Dissuasion Network

Portuguese Policy on Drugs

WORLD DRUG REPORT 2009

"Portugal is an example of a country that recently decided not to put drug users in jail. According to the International Narcotics Control Board, Portugal's "decriminalization" of drug usage in 2001 falls within the Convention parameters: drug possession is still prohibited, but the sanctions fall under the administrative law, not the criminal law."

Portuguese Policy on Drugs

INTERNATIONAL NARCOTICS CONTROL BOARD

Legal Framework in Portugal

Portuguese approach is a model of best practices:

fully committed to the principles of the drug control conventions
putting health and welfare in the centre
applying a balanced, comprehensive and integrated approach
based on the principle of proportionality and the respect for human rights,

Addictive Behaviours and Dependencies

NEW CHALLENGES I

Patterns of harmful alcohol use – youngsters

Responses involved: preventive, HRR

Recreational, Community and School settings

Coordination among different entities

Cannabis related problems

From 2012 on: cannabis replaced heroin as the main substance involved in new treatment demands

Different population: younger, working and / or studying, good level of social and family insertion, higher education level

High potency cannabis products: increased incidence of severe psychopathological crisis on cannabinoids consumers

Addictive Behaviours and Dependencies

NEW CHALLENGES II

New Psychoactive Substances

Indicators show a low level of NPS use in Portugal, but:

increasing number of such substances identified in Europe

trade of NPS via the internet

data from other countries show an increasing use of NPS

Ageing

Significant group of patients retained in the services, long treatments, failing to achieve autonomy

Age-related diseases emerged, interacting with the original addictive disease => new set of bio-psycho-social problems

Specific programs for these patients: Therapeutic Communities - Long Term Program

Others?...

Trends since 2001

CONCLUSION

There is a coherent articulation among
ALL THE PORTUGUESE POLICY AND ACTIONS

based on the idea that **DRUG ADDICT** is a **PERSON**

with health and social needs

instead of a

“CRIMINAL or a DELIQUENT”.

Until now, the global drug situation in Portugal seems to have a positive evolution in all the available indicators

Thank you for your attention!
