Dear team members of community affairs (NT intervention.)
I always believed that Australia is afair and lucky country with social justice. My friends in Germany too have the same
opinion.
After having watched " Our generation in Germany " I / We were shocked to discover that it is one of the most racist countries.
This is very disappointing to me / us.
Hence I am taking the trouble to write / make a submission to Senat Committee because of this concern.
I / We have never thought that Australians to be Hippocrates in their treatment of Aboriginal people and had always held
them in high regards.
This news are very disappointing

A.Vyas
