To Whom It May Concern

I request it be noted by The Legal and Constitutional Affairs Legislation Committee that I strongly support the **Ensuring Northern Territory Rights Bill 2021**. It is of vital importance that all Australian states and territories have an equal right to create their own legislation.

This Bill is of great consequence to so many individuals — not only those seeking to overturn the Euthanasia Act 1997, but also for people in determining employment disputes and seeking parity in property acquisition.

It is critically important that in twenty-first century Australia, we restore the right of the Northern Territory to pass its own legislation. I feel very strongly about this matter and implore you to make a fair and considered decision.

Thank you for taking the time to read this submission.

Kind regards,
Samara Thomson
