

Dear Legislators

It is more than time that Aboriginal people are at the heart of any decisions to do with their futures.

The rushed Northern Territory Intervention that seems to have benefitted too few Aboriginal people and done little to stem the "violence" ought not to be extended for another 10 years.

Please don't take this disastrous step that will only benefit white public servants and create a further sense of being disenfranchised for our original inhabitants who should be valued and supported.

With blessings for your good sense in averting this wrongdoing,  
Shefali
